

Your trusted partner that puts security first.

Only Diligent is uniquely positioned to offer its clients the highest level of assurance around security measures. With ongoing investment and dedication to security technology, resources and infrastructure that no other provider can match, Diligent clients gain a strategic partner that truly puts security first.

External SSO for Diligent's Solutions

In direct response to feedback from clients, Diligent is pleased to now offer External SSO for added security when authenticating user access to Diligent's solutions using the identities that already exist in your corporate environment. With External SSO, IT teams can seamlessly control the access management of the Diligent platform.

- Leverage a company email address or their corporate username to log into the Diligent platform
- Password & authentication process in line with the company's IT policy
- Supports SAML 2.0 providers Azure AD, ADFS and Okta
- Products supported include Diligent Boards, Minutes, D&O and Evaluations
